土石流

警戒区域

特别警戒区域

地すべり

The diagram illustrates a landslide on a hillside. A cross-section shows a hill with trees on the surface and a large, irregularly shaped area of soil and rock sliding downwards. This sliding area is filled with a pattern of small circles and dots, representing the internal structure of the landslide. A line points from the text '警戒区域' (Warning Area) to the boundary of this sliding area. Below the main diagram, there is a separate, elongated shape also filled with the same pattern of small circles and dots, representing a warning zone for a potential landslide.
